Duration set: < 1.5 hours

## BIOGRAPHY

JOURNEY TO iO started its mission in 2019: fat rock songs with power riffs, epic solos and catchy choruses. The iO in the band's name stands for Jupiter's moon Io, the most energetic and volcano-active planet in the solar system - and that's precisely what J2iO want. Energetic NU rock that invites you to join in.

## PRESS (TEASER) TEXT

Ladies and Gentlemen, we welcome you on flight 666 from planet Earth to Jupiter's moon Io, with an estimated flight time of 55 minutes. You may experience some unusual turbulence during your flight, so please prepare yourself for powerful riffs, epic solos and rousing vocals. Our onboard service will happily serve you an energy drink or a cold beer. Please check whether there are masks and life jackets at your seat, and you will find our safety instructions on how to sing along to all the lyrics. Today's selection deals with socially critical topics, broken hearts and the party life of a rock'n'roller. Some passengers report seeing a neon green monkey during their flight. We assure you we fulfil all possible safety standards, but iO-Airlines accepts no responsibility for any risks arising during loud singing or headbanging. We wish you a pleasant flight and ask, „Are you ready to rock?“
